_NPCS/JSONReader.h

```
graph BT; A["C:/Users/Kyle Tuckey /Documents/Final Year Project/Social_NPCS/Social_NPCS/JSONReader.cpp"] --> C["C:/Users/Kyle Tuckey /Documents/Final Year Project/Social_NPCS/Social_NPCS/JSONReader.h"]; B["C:/Users/Kyle Tuckey /Documents/Final Year Project/Social_NPCS/Social_NPCS/Social_NPCS.cpp"] --> C;
```

This diagram illustrates the relationship between two source files and a header file in a C++ project. Two boxes at the bottom represent the source files: 'JSONReader.cpp' on the left and 'Social_NPCS.cpp' on the right. Both boxes have arrows pointing upwards to a single box at the top, which represents the 'JSONReader.h' header file. The header file box is shaded gray, while the source file boxes are white.
